Manson

Introduction

Mr. C.Y.LIU
DIRECTOR

It is our pleasure to introduce Manson as one of the world leading companies in Power Electronics. It was established in 1983 to design and manufacture telephone analyzers and regulated power supplies for electronic industry in Hong Kong.

Since then, Manson has been specialized in this field providing DC Regulated Power Supplies, Switching Mode Power Supplies, DC-DC Converters, DC-AC Inverters, Lead-Acid Battery Chargers, Power Transformers and so on.

Safety and Reliability are two key factors in making our products from concept to the finished product series. We never compromise our high quality standard in workmanship, or in the selection of components for price competition.

Manson

Head Office

Head office is located in Hong Kong to maintain international customers with a sophisticated manner in marketing, taking orders, material procurements, shipping and administration.

Out Line

Address : Unit A1, 12.F., Yip Fung Ind. Bldg.
Kwai Fung Crescent, Kwai Chung,
N.T. Hong Kong.

Tel / Fax : 852 24287802 / 852 24892369

Established : 1983

Area : 200 sq. M

Employee : 15

Production Equipments

Our major production equipments are completed with:

- ◆ Metal punching machine 60N to 600N
- ◆ Precision transformer wire winding machines
 - ◆ EI - transformer laminating machine
 - ◆ Vacuum impregnation equipment
 - ◆ Wave solder machine
- ◆ On-Line computerized auto-test system
- ◆ Fully controlled Burnt-in testing facility

Manson

Products

Our wide range of products are made to meet applications for Telecommunication, Audio, Ham Radio, Marine, Education, Laboratory, Field Service, Security and etc.

Some of our products adopt the latest micro processor and power electronics technologies.

It is integrated with Personal Computer using our software. Detailed specifications are available with Individual leaflet upon request.

Built-in Power Supplies for industrial application are prepared for tailor-made.

Our specialized products are qualified under strict and severe requirements by major manufacturers. They are for a universal input 100VAC to 240VAC, either single or multiple outputs and 25W to 1KW consumptions.
